Section 10

## General Details / Operating Condition:

This Waiver supersedes the 'Explanation of Notes' with Section 10 of the ARTC TOC Manual 'Locomotive and Rolling Stock Data'. This TOC Waiver also supersedes TOC Waivers 23062. Until further notice the relevant section, 'Explanation of Notes', has been stood down and this is the single source for 'Locomotive and Rolling Stock Data' 'Explanation of Notes' thus all TOC Waivers that refer to the 'Explanation of Notes' shall have any details superseded by details provided below.

In addition, all vehicle speed classes are no longer link the vehicle loading to the speed for any particular ARTC route.

Unless a maximum operating speed has been noted on the vehicle registration, the maximum vehicle speed is to read as the "max speed" for the registered "Speed Class".

Max Speed (km/h) <sup>2</sup>	115	100	80	65	80	65	60

Notes:

- Maximum vehicle speed of 60km/h for "G" category (30 tonne axle load) vehicles applies unless there is an applicable "Special Access Condition" within the appropriate ARTC Route Access Standard (RAS) Section Page.
- 2. If applicable Route Capacity for the axle load and section is less it shall govern the maximum vehicle speed, refer to the Route Capacity tables in applicable ARTC RAS Section Page
