Application Network wide

Relevant Standards

Conditions of Approval

1. It remains the responsibility of the supplier (Stanley Engineered Fastening) and the maintainer to ensure that the individual lockbolts used for specific applications meet the performance requirements of the specific location and service.

A general condition of approval is that the supplier remains accredited to ISO 9001 specifically for these products and ARTC is advised on a 12 monthly basis that accreditation is current. ARTC reserves the right to conduct its own audit of the manufacture and supply of these components to AS 19011.

Any subsequent change to the design, materials or manufacturing process is not covered by this approval. The manufacturer should notify ARTC of any modification or changes in order to obtain a valid certificate.
